

USER FRIENDLY MONITOR UNIT SETTING BASE WITH SLIDABLE KEYBOARD

ABSTRACT

A notebook type PC, for easier use by a user, including a liquid crystal monitor unit, a mainframe section, and an arm for connecting the liquid crystal monitor unit to the mainframe section, is provided. One end of the arm is connected to the liquid crystal monitor unit by a rotatable first hinge. The other end of the arm is connected to the mainframe section by a rotatable second hinge. The angle and distance of the liquid crystal monitor unit with respect to the mainframe section can be set freely by the first hinge and the second hinge.
